

TDAP Shots Available Now!!!

Last Updated Tuesday, 26 July 2011 15:03

Do you have a student going into 6th grade and they are 11 years old? Just bring them here and we will take care of their TDAP shot for them. Be sure to bring their blue shot record to get updated. The Alabama Department of Public Health says: "... all students 11 years of age and older entering the sixth grade in Alabama schools during the 2011-2012 school year are required to have a tetanus-diphtheria-acellular pertussis (Tdap) vaccine. Students entering the seventh grade during the 2011-2012 school year who did not receive the Tdap vaccination during the 2010-2011 school year are required to have the vaccination."
